

Developmental Stuttering Lab Directions: Jesup Building Location (Room 202)

PARKING

The parking lot for study participants is located at the corner of Horton Avenue and 18th Avenue South. There are reserved parking spaces for study participants in the on-campus parking spaces. These spaces are NOT in the large parking lot across 18th Avenue, but are in a row on the campus side of 18th Avenue.

Once you turn into the parking area, the spots are to the right and are marked “For Research Participants Only” (head-in parking).

Someone from our lab will meet you in the parking lot to provide you with a parking pass and to walk you over to our building. Please call if there is anything with can assist you with (615-322-8141).

GPS SYSTEMS

GPS systems can be pointed to the following latitude and longitude for the Jesup parking spaces: Lat: 36.141308°; Long: -86.796291°. They can also be pointed to 1295 18th Ave. S, Nashville, TN, 37212, which will take you to the intersection that is nearest the parking entrance. GPS systems sometimes fail or direct people to the wrong place, so please double-check the GPS track before you leave and call the front desk if you have any trouble finding us (615-322-8141).
